- +90 552 796 26 46
- Edirne / Turkey

LANGUAGE

- English - B2
- Turkish - Native

Experience

Cosmos Institute (9 Months)

- Internship (Feb 2023 - July 2023)
- Backend Developer (July 2023 - Now)

During my working process, I developed Rest APIs for Websites, mobile applications and web applications. I used NestJS Framework, which is an improved version of ExpressJS in my development process.

During my development process with NestJS, I wrote the auth module by processing JWT tokens using strategies and guards in the PassportJS package, and the purchase transactions using the lyzico module. I worked on it by processing JSON data. I designed the distance and mapping of users and places by instantly taking latitude and longitude on the map, as well as designing appropriate SQL schemas for each application by associating them.

Projects I am involved in; Conval Website, LabConnect & MedConnect, Trakya Teknopark Reservation and CV System

Skills

- Problem Solving
- Teamwork
- Time Management
- Solution Oriented

Tech

- Javascript & Typescript
- MS SQL & MySQL & SQL
- ExpressJS & NestJS Framework
- NodeJS, Git, Rest API
